PROFESSIONAL PROFILE

Student in the **Computer Technologist program (4th semester)**, Network Technician, and Technical High School graduate in IT. I began my technical training in information technology six years ago and have developed it through studies, certifications, projects, and collaborative work. My profile is focused on **Full-Stack Development and Software Engineering**, with emphasis on backend development, REST APIs, databases, and software architecture. I have built solutions that integrate frontend applications, backend services, authentication, persistence, testing, automation, and deployment. I am looking to join a development team where I can contribute a broad technical foundation, autonomy, and strong learning ability.

TECHNICAL STACK

Backend & APIs: Java, Spring Boot, REST APIs, TypeScript/JavaScript, Node.js, Express, PHP, Laravel, Maven

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, UI integration

Data: PostgreSQL, SQL, Supabase, MariaDB, relational modeling, migrations

Architecture: microservices, layered architecture, OOP, client-server, JWT, RBAC

DevOps & Systems: Docker, OpenShift, Git/GitHub, GitHub Actions, CI/CD fundamentals, Linux, Bash, PowerShell

Testing & Quality: JUnit, xUnit, Jest, Cypress, Supertest, Postman, Bruno, Swagger/OpenAPI, debugging

COLLABORATIVE TECHNICAL EXPERIENCE

Backend Developer - Professional Work Simulation

ID for Ideas | Genius: modular business management platform | June 2026 - July 2026

- Contributed to a platform built with Java and Spring Boot, validating features, integrations, and REST API flows before integration.
- Executed tests with JUnit, validated components, and performed debugging; documented APIs using Swagger/OpenAPI.
- Collaborated using Git/GitHub, team meetings, planning, and task tracking under Agile and Scrum practices in a distributed team.

FEATURED PROJECTS

CDev Studio Platform

TypeScript | Express | React | PostgreSQL | REST APIs | Microservices

- Designed and developed an ecosystem with three frontend applications and three decoupled backend microservices, including REST contracts and integrated local execution.
- Implemented PostgreSQL persistence with versioned migrations, domain separation, and idempotent seed data.
- Implemented JWT/RBAC authentication and authorization; documented architecture, APIs, and the data model; added automation with Bash and PowerShell.

FEATURED PROJECTS

Cataleya Perfumería

Full-Stack | React | Supabase | E-commerce

- Developed an e-commerce experience with a React frontend, persistence in Supabase, and responsive behavior.
- Implemented a back-office for managing products, pricing, and content, together with deployment and version maintenance.

PrivLock - Windows Privacy Application

C# | .NET 10 | WPF | xUnit | Layered Architecture

- Developed a native application that blocks and restores camera and microphone access through system policies and device control in a reversible way.
- Structured the solution into application, domain, infrastructure, and user-interface layers, including logging and failure recovery.
- Built a suite of 26 unit tests with xUnit to validate behavior, previous states, partial failures, and feature recovery.

WORK EXPERIENCE

Inventory Control Assistant

Paid experience in supermarket environments

- Classified, counted, and recorded products using specialized devices and software; managed codes and information categorization.
- Followed procedures, timelines, and accuracy standards while working collaboratively in an operational environment.

EDUCATION

Computer Technologist Program | Higher School of Informatics (ESI) / Faculty of Engineering, Montevideo
2025 - Present (4th semester)

Network Technician | Instituto IBEC | Completed in 2026

Technical High School Diploma in IT | Higher School of Informatics (ESI) | Completed in 2024

FEATURED CERTIFICATIONS & COURSES

- AWS Generative AI and AI Agents with Amazon Bedrock - Professional Certificate | Amazon Web Services / Coursera
- Advanced Java | LearnQuest / Coursera
- Docker Basics for DevOps | KodeKloud / Coursera
- Object-Oriented Programming with Java | Universidad de Palermo / Coursera

LANGUAGES

Spanish: Native | **English:** Intermediate in reading and technical comprehension; spoken fluency in development
